

GeoPay — How It Works

A simple step-by-step guide to getting your land surveyed and paying safely on the blockchain

Client

Land owner who needs a survey done and pays the fee

Surveyor

Licensed professional who does the field survey work

Smart Contract

Holds the money safely until work is done — no middleman

SURCON/NIS

Government body that approves the survey and receives 70%

1

Enter Your Land Details

CLIENT

Tell GeoPay how big your land is (in square meters) and whether it is private or commercial. The system automatically finds the correct official fee from the Kwara State government fee schedule.

20 official fee tiers

Private or Commercial

Auto-calculated

2

Lock Your Payment in Escrow

CLIENT

You pay the official survey fee in SUI tokens. The money goes into a **smart contract (escrow)** — think of it like a digital safe. Nobody can touch the money until the surveyor completes the job.

 **7-Day Deadline starts now** — the surveyor must submit the survey document within 7 days or you get your money back automatically.

STATE: PENDING

Money safely locked

7-day countdown starts

3

Surveyor Does the Field Work

SURVEYOR

The licensed surveyor goes to the land, measures the boundaries, and prepares the official survey plan. This must be done within **7 days** of the client locking payment.

 The surveyor prepares the Digital Red Copy — the official survey document in DWG, PDF, AutoCAD or any format.

4

Upload the Survey Document

SURVEYOR

The surveyor uploads the completed survey document (in any format — DWG, PDF, AutoCAD, DXF, PNG) to **Walrus** — a decentralized storage system. The file is stored permanently and cannot be deleted or tampered with.

 Walrus is like a permanent, tamper-proof filing cabinet on the blockchain. The document stays there forever.

STATE: SUBMITTED

Stored on Walrus

SURCON/NIS notified

5

SURCON Reviews & Approves

SURCON/NIS

6

The regulatory body (SURCON/NIS) is automatically notified when the document is uploaded. They review the survey plan to confirm it meets all official standards, then **approve it directly on the blockchain**.

✓ This approval is recorded permanently on-chain — it cannot be faked or altered by anyone.

✓ **Client Confirms & Payment is Released** CLIENT

Once SURCON approves the document, the client confirms they are satisfied. The smart contract **automatically splits and sends the payment** — no manual calculation, no delays, no middleman.

STATE: COMPLETED Instant payment split Zero middleman

💰 **How the Payment is Split Automatically**

30%
📐 **Surveyor**
Payment for professional service

70%
🏛️ **SURCON / NIS**
Mandatory regulatory remittance

📊 **Job Status — What Each Stage Means**

🕒 **What if the Surveyor Misses the 7-Day Deadline?**

No problem! If the surveyor does not upload the survey document within 7 days, the client can claim a **full automatic refund** directly from the smart contract — no need to contact anyone, no delays, no arguments. The blockchain handles it automatically.

EXPIRED → Full refund automatically sent to client wallet

⚖️ **What if There is a Disagreement?**

- 1 Either the **client or surveyor** can raise a dispute if they are not satisfied. They explain the reason on the blockchain.
- 2 The job is **frozen** — nobody can touch the money while the dispute is being reviewed.
- 3 **SURCON/NIS reviews** the dispute fairly and decides on a custom split — for example, 50% to surveyor and 50% refund to client.
- 4 The smart contract **automatically sends** each party their agreed amount — instant and tamper-proof.

DISPUTED → SURCON resolves with fair custom split
